

**Amended Claims:**

1. (Currently Amended) An apparatus comprising a housing, a microphone, an earpiece, a display screen mounted in the housing, a plurality of keys mounted on the housing and individually depressible for performing telephony operations, radio circuitry, and a processor configured to provide a browser for navigating between different pages stored remotely of the apparatus ~~mobile-telecommunications device~~ and displaying information therefrom on the display screen, wherein an individual key of said plurality of keys is configured to operate in a first mode comprising a first depression sequence pattern of said individual key to navigate between previously visited pages and said individual key further being configured to operate in a second mode comprising a second depression sequence pattern of said individual key to provide a display of previously visited pages to permit the selection of a page from the display of previously visited pages and the navigation directly thereto.

2. (Previously Presented) An apparatus according to claim 1 wherein said individual key is operable to navigate backwards through previously visited pages.

3. (Previously Presented) An apparatus according to claim 1 wherein said individual key is operable to navigate forwardly through previously visited pages.

4. (Previously Presented) An apparatus according to claim 1 wherein the first and second modes are selected by operating said individual key for relatively shorter and longer periods respectively.

5. (Previously Presented) An apparatus according to claim 1 including a scrolling key operable to scroll a focus region through the display of previously visited pages for selecting one of the pages.

6. (Previously Presented) An apparatus according to claim 1 including a further key for selecting a page from the previously visited pages display so as to navigate directly thereto.

7. (Previously Presented) An apparatus according to claim 1 and comprising a mobile telephone handset.

8. (Previously Presented) An apparatus according to claim 1 and comprising a PDA.

9. (Previously Presented) An apparatus according to claim 1 wherein the display of the previously visited pages comprises a display of the previously visited pages whereby to permit the user to select one of the previously visited pages and navigate directly thereto.

10. (Canceled)

11. (Previously Presented) An apparatus according to claim 1, which is WAP enabled.

12. (Previously Presented) A method of configuring a browser to operate in an apparatus, including configuring an individual key of the device to operate in a first mode to navigate between previously visited pages, configuring the individual key to operate in a second mode to provide a display of previously visited homepages and to select one of the pages from the display of previously visited homepages to navigate directly thereto.

13. (Previously Presented) An apparatus comprising a browser configured to permit navigation between different network addresses and display information therefrom, and a key configured to operate in a first mode to navigate between previously visited network addresses and configured to operate in a second mode to provide a

display of previously visited homepages to permit the selection of a homepage from the previously visited homepages display and the navigation directly thereto.

14. (Previously Presented) An apparatus according to claim 13 including a key to scroll a focus region between suitable menu options displayed on the browser, to permit navigation between different network addresses.

15. (Previously Presented) The method of claim 12, wherein the first mode includes pressing the individual key for a first period of time and the second mode includes pressing the key for a second period of time, the second period of time greater than the first period of time.
